Course: Enterprise Real-Time Data Engineering

Instructor: Mohamed Fouad Fakhruldeen (Fakhr.me)

Course Portal: fakhr.me/KafkaSpark

Code & Labs Repository: github.com/fakhruldeen/KafkaSpark

Apache Kafka, Confluent and Spark lab repository

Start here: the Phase 4 document **Lab 00 — Environment Setup** (Phase4_Lab00_Setup.md).

Quick start, from the repository root, in a WSL, macOS or Linux terminal:

```
make test            # offline unit tests, no Docker needed
make up              # start the stack and wait for health checks
make check           # every service must print PASS
make topics-create   # create the lab topics
```

Each module has its own lab document. Run Python with `python3 -m python.<name>` from this folder.
